

WEDDING PHOTOGRAPHY PRICELIST

Lavenham Photographic

www.lavenhamphotographic.co.uk

I am a full-time professional wedding photographer, using the latest photographic equipment and techniques, to provide a professional service that captures every aspect of your wedding day – the atmosphere and the events of your whole day as it happens.

Most of the day is photographed in a candid, “reportage” style, so you are free to spend plenty of time with your guests. This informal style of photography really captures the atmosphere of the wedding without intruding on the enjoyment of the day.

I am always smart, polite, professional and approachable.

I leave the bride and groom as much time as possible to mingle, while I circulate, both taking candid photographs, and approaching families, couples and small groups to get as wide a range of photographs as possible of your entire wedding in a true and atmospheric style.

Even the line-ups need not be too formal, and the arranged shots are seldom heavily posed. I prefer to photograph you looking comfortable and relaxed, in beautiful surroundings that make for memorable photographs.

Photographs are uploaded to our website after the wedding (if you wish), so your guests can order photographs online without any inconvenience to you.

I use only the finest quality cameras and lenses, to produce the highest quality images possible, nothing is more satisfying to me than beautifully sharp images!

Albums and prints again are the finest quality available. I won't cut corners on choosing the best suppliers.
